

HANG-ON

A GAME THAT SURPASSED THE CONCEPT OF WHAT A GAME SHOULD BE!

SEGA®

"HANG-ON" is a first of its kind in the world, a motorcycle simulator game. Completely new and different from any conventional machine, it features both the realism that one experiences when riding a "real" motorcycle and the maximum in game enjoyment that only comes when you are competing in a hotly contested race. For that once in lifetime thrill, hop on the "HANG-ON" and roar away.

GAME FEATURES

- In the "HANG-ON" game, you maneuver the motorcycle shown on the screen by actually using various riding techniques.
- The player can fully enjoy the exciting realism of racing by making full use of riding techniques such as HAND-ON, SLOW-IN FAST-OUT, OUT-IN-OUT, etc.
- The course is comprised of 5 stages i.e., ALPS, GRAND CANYON, CITY NIGHT, SEASIDE, and the CIRCUIT. Beautiful scenery vividly depicted on the video screen makes the racing atmosphere even more pleasant and exciting.
- "HANG-ON" is equipped with 4 built-in stereo sound speakers. Its exhaust sound and the roar emitted when passing your competitors are both extremely authentic.
- Features the precise simulation of many realistic techniques not only for the player but also for the on-screen competitors' motorcycles.

• Moving your weight quickly results in skillful cornering, thus enabling you to score many points. Beware of coming into contact with the competitor's motorcycle, going off the course, and colliding with obstacles outside the course.

HOW-TO

• When a competitor's motorcycle appears on the screen, goes into a corner, or makes a right or left turn, the player's taking immediate action at just the right moment.

MOTORCYCLE RACING GAME !!

0-PLAY

- There are a total of 5 STAGES on the course. Passing the checkpoint that appears every time a STAGE is cleared will earn you additional time. The game ends when there is no more time remaining.

- To start the START screen ON to begin the race.

- Accelerating and braking are done by using the right hand grip. Turning the right hand grip to the right will increase the speed and turning it to the left will decrease the speed. Also, attached to the right hand grip is the braking lever.
- The player drives the motorcycle along the course shown on the screen. When taking a curve that comes to the right/left, shift your motorcycle to the right/left side to it to bank the curve.

ALPS

GRAND CANYON

CITY NIGHT

SEASIDE

CIRCUIT

HANG-ON

WITH REALISM THAT YOU WOULD EXPECT TO FIND IN A TRAINING SIMULATOR AND NOT A GAME, IT'S GONE TO BE ANOTHER FIRST FOR SEGA™ IN THEIR NEVER ENDING QUEST TO UP GRADE TODAY'S GAME STANDARDS WITH TOMORROW'S FEATURES.
